

# ULTIMATE RESIDENTIAL INSTALLATION FEATURING 4K SUPER SIMULATOR AND 4K CINEMA ROOM, INCREDIBLE RECREATION

A residential owner has requested the best possible turnkey solution for a designer games room, in southern England. The centrepiece is a state of the art 4K Super Simulator with 32+ very popular sports, 2,465+ famous sporting venues from around the world and 685+ enjoyable game challenges. The system is connected to the internet ensuring that the simulator technology is regularly updated free of charge so that it is always fresh and exciting for family and friends. Sports that are proving to be the most popular so far in this home are football, rugby, tennis, golf, cricket, hockey, basketball, contest golf, baseball, gridiron and archery. The super simulator is used for training, competitions as well as entertainment. This palatial home was designed so that players can easily travel between the super simulator and the cinema room, to enjoy an incredible 4K projection paired with a 4K image screen and complete Dolby surround sound. The authentic red themed cinema seats were custom made to match the red upholstered wall panels, which in turn even matches, the limited edition remote control. Bespoke cinema features include ambient colour changing LED lighting and a starscape infinity fibre optic ceiling to give an amazing experience. The cinema experience is amazing with the latest movies shown through comprehensive streaming, satellite and dvd's so filmgoers are fully entertained.
